

Cleaner Spaces Happier Places™

PooStation is a next-generation commercial pet waste management system engineered for greater capacity, improved accessibility, cleaner operation, and reduced routine maintenance.

Pet waste left on the ground can introduce harmful bacteria and excess nutrients into stormwater and local waterways. Effective pet waste management depends not only on installing stations, but on keeping them visible, accessible, properly stocked, and easy to maintain. PooStation was designed around those real-world requirements.

"Installing permanent structures can be an effective way for a municipality to help overcome barriers while still providing an opportunity to educate."

— U.S. Environmental Protection Agency
Stormwater Best Management Practice:
Pet Waste Management

Motion-Activated LED Safety Light

Improves visibility in low-light conditions.

1,200-Bag Capacity

Holds 1,200 oversized biodegradable pet waste bags—approximately two to three times the capacity of many traditional stations.

Dual Empty-Side Indicators

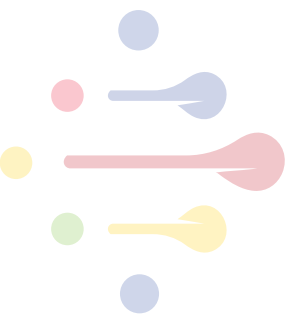

Clearly identifies when either side of the dispenser requires refilling.

ADA Hand Lever & Foot Pedal

Two convenient operating methods designed for accessibility, cleaner operation, and ease of use.

20-Gallon Waste Bin

Approximately twice the capacity of many traditional 10-gallon receptacles, helping reduce routine servicing frequency.

Why Communities Choose PooStation

PooStation was not designed simply to improve the traditional pet waste station; it was designed to replace it with a cleaner, more accessible, higher-capacity solution for modern communities.

Every feature was engineered to improve visibility, cleanliness, accessibility, maintenance efficiency, and long-term value—while delivering the premium appearance today's properties expect.

Quick Specifications

- ✓ **Overall Height:** 8 ft. 3 in. / 251 cm
- ✓ **Bag Capacity:** 1,200 bags
- ✓ **Included with Each Station:** One carton containing 20 rolls of biodegradable pet waste bags and **one box** containing 35 drawstring waste liners
- ✓ **Waste Capacity:** 20 gallons
- ✓ **Bag Size:** 9 × 16 inches
- ✓ **Construction:** Commercial-grade steel
- ✓ **Operation:** ADA hand lever and foot pedal
- ✓ **Lighting:** Motion-activated LED safety light
- ✓ **Warranty:** 5-year limited station warranty
- ✓ **LED Warranty:** 2 years
- ✓ **Status:** Patent pending

Compare the Difference

	Traditional Station	PooStation
	Approx. 400–600 Bag Capacity	1,200-Bag Capacity for Oversized Biodegradable Bags
	Approx. 10-Gallon Waste Bin	20-Gallon Waste Bin
	No Empty-Bag Indicator	Dual Empty-Side Indicators
	Touch-Only Operation	ADA Hand Lever & Foot Pedal
	No Integrated Lighting	Motion-Activated LED Light
	Standard-Size Waste Bags	Oversized 9 × 16-Inch Biodegradable Bags
	Frequent Refilling and Servicing	Reduced Routine Maintenance
	Standard Construction	Commercial-Grade Steel Construction
	Basic Utility Appearance	Premium Commercial Design
	Standard Market Pricing	Competitive Station and Bag Pricing
	Higher Long-Term Service Demands	Better Long-Term Value
